"EXTRAS"

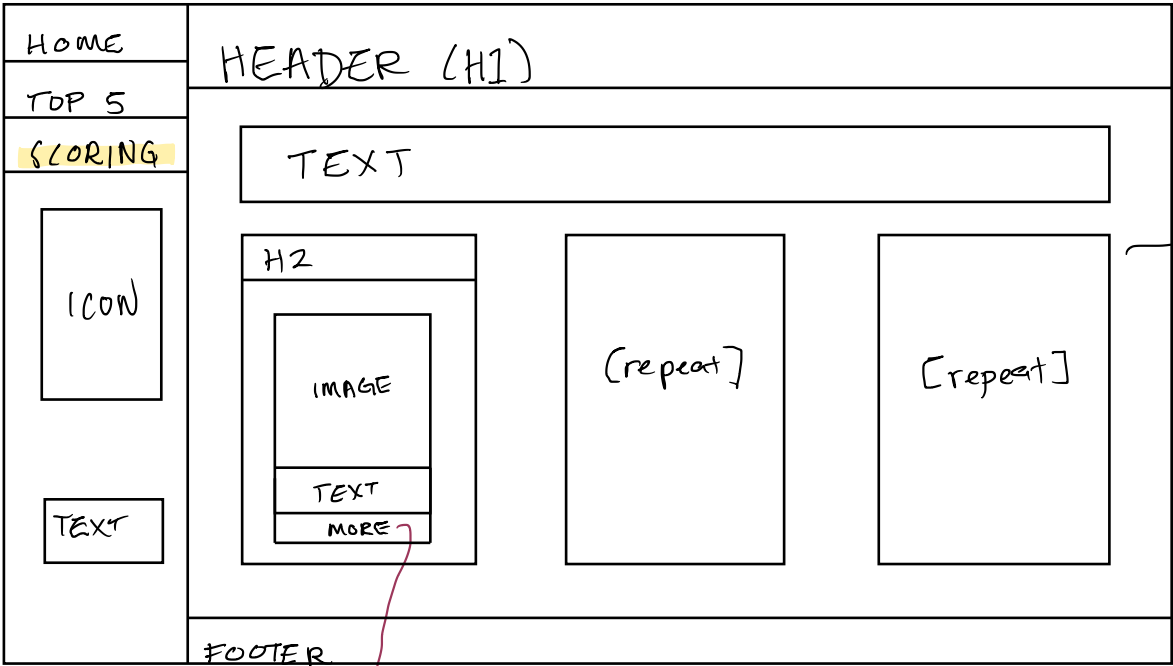

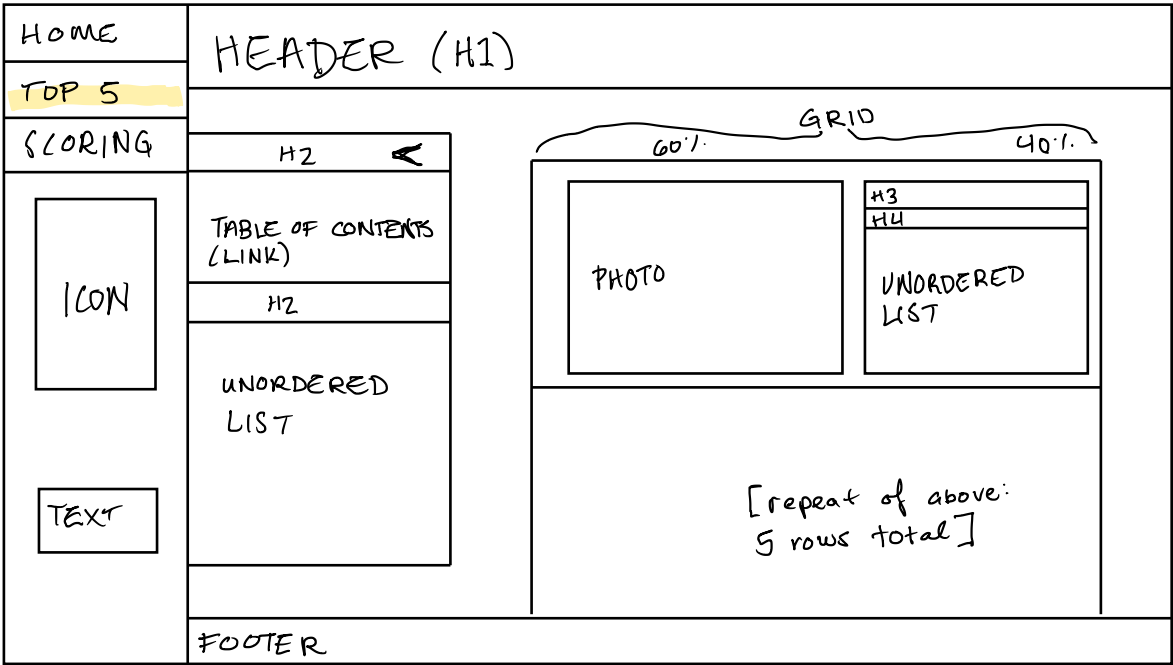

Write-Up  
I will continue building a site that I have been working on throughout the specialization. It is a small site about some of my favorite lighthouses. I intend to refine the style, add mobile and tablet views, and add some "extras," primarily with JavaScript and plug-ins. These will be:

1. Interactive map (plug-in)
2. Two collapsible/expandable items, one on mobile and one on large screen (JS)
3. Pop-up image slideshow (JS)

I will also test contrast in both light and dark modes and ensure that there are no animations/transitions in reduced motion mode.

collapsible, grid expands when sidebar collapses

FLEX (10 ELEMENTS)

when clicked, image slideshow appears
